

**FAA CERTIFIED
OPERATIONALLY APPROVED
IN REVENUE SERVICE TODAY**

SAFEROUTE.™

IT ALSO AVOIDS COLLISIONS WITH THE ENVIRONMENT.

Less fuel

Less emissions

Less noise

And more green with SafeRoute

FAA certified SafeRoute ADS-B Software Solutions boost air traffic efficiency and help flight crews avoid runway incursions. They also offer environmental benefits by managing the spacing between aircraft during approach, which reduces vectoring and enables Continuous Descent Arrivals. That will save operators hundreds of pounds of fuel while dramatically reducing emissions and noise. Things we all want to avoid. To see how SafeRoute can lead all airplanes to a better place, go to acss.com.
